

ALUGREASE® AL

Categorie Prodotto: [Anti-seize compounds](#), [Production and maintenance auxiliaries](#), [Energy and environment](#), [Cement industry](#), [Lumber industry](#), [Glass industry](#), [Paper industry](#), [Plastics industry](#), [Pharmaceutical industry](#), [Steel industry](#), [Textile industry](#)

Introduzione

USES

Assembly compound

Descrizione

SAE - ISO VG - NLGI Gradation

NLGI 2

Operating temperature °C

From - 15 to +1200

Viscosity index

-

Properties and performance

Aluminium-based antiseize compound, for very high temperature applications, with moisture, marine or aggressive environment. Specially designed for threads, gas valves, turbines, steel works, plastic injection moulds, etc.

Specifications and fields of use

Exceeds the requirements of MIL-A-907 D.
