

ALUGREASE® AS AD

□

Categorie Prodotto: [Bearings](#), [Chains](#), [Cogs and gear-shafts](#), [Food industry](#), [Greases](#), [Pivots, ball joints, couplings](#), [Glass industry](#), [Pharmaceutical industry](#), [Textile industry](#)

Introduzione

USES

High-temperature bearings exposed to water wash-out, grease-lubricated gearboxes

Descrizione

SAE - ISO VG - NLGI Gradation

NLGI 0,1,2

Operating temperature °C

From - 30 to + 180

Viscosity index

-

Proprietà e Prestazioni

"Non-toxic, high-performance, water-repellent, synthetic high temperature grease contains special white solid lubricants. Featuring outstanding anti-wear and thermal stability, it is recommended for all bearings and components in machinery employed in the food industry (dairies, pasta factories, bakeries, etc.). Very long re-lubrication intervals.

Specifications and fields of use

Non-toxic lubricant. It is included in the list: FDA (FOOD AND DRUG ADMINISTRATION) 21 CFR Section 172.878.

Velocity factor (DmxN)

←=250000
