

ALUSYNT® E 20W-50

□

Categorie Prodotto: [Motors](#), [Oils](#)

Introduzione

USES

Gasoline and diesel engines (including turbocharged)

Descrizione

SAE - ISO VG - NLGI Gradation

SAE 20W-50

Operating temperature °C

From - 15 to +180

Viscosity index

Greater than 190

Properties and performance

Synthetic multigrade high-performance lubricating oil for sporting and mass-produced engines regardless of engine capacity. It makes for real power increases of up to 4% of the total, at lower engine revolutions.

Features excellent heat transfer and removal, enabling the engine's operating temperature to be reduced by a few degrees.
